

Company Quality and Environmental Policy Statement

In addition to the range of products offered by the company, the management of Kane International Limited has established Quality Standards in accordance with BS EN ISO 9001:2015 and Environmental Standards in accordance with BS EN ISO 14001:2015 respectively (with no reduction within their requirements), and the specific demands of ISO IEC 17025:2005 in relation to calibration equipment. These standards are operated and maintained through UKAS registration and annual review by third party assessment and fully supported Internal Audit programme.

The company has developed and installed a documented Quality and Environmental Management System maintained through its management control system that is appropriate to the nature, scale and impacts of its business. Its commitment to continual improvement in performance and management awareness of customer requirements enable it to provide reliable and defect free products and services, and are measurable through its management review processes, its objectives and on-going improvements policy.

The Company's objectives and management control ensure high level of performance, whilst complying with all relevant legislation and regulatory requirements demanded by its customers. All aspects of its Environmental Standard are incorporated within its management activities where the organisation has control or influence, and its demands are fully assessed. Control procedures are installed in order to incorporate all existing products, new developments, together with services that are likely to impact on its day-to-day business / environmental operation.

It is the policy of the Company to employ suitably qualified and experienced staff and where necessary, provide training, thus enabling the Company to provide the highest standards of Quality and Environmental awareness and competency that are essential to its requirements.

Responsibilities and authority are well defined as part of this process, in order to sustain high levels of management control. There is a programme of continual improvement associated with both Quality and Environmental awareness within the various elements of the business, encompassing Customers, Employees, Sub-Contractors and Suppliers alike.

The Company provides and maintains a safe and healthy working environment in compliance with Government Legislation relating to Health & Safety and associated matters and all other relevant UK and European Legislation.
